JOURNAL OF AEROSOL SCIENCE

In association with the Gesellschaft für Aerosolforschung (GAeF)
Association for Aerosol Research

Founding Editor Prof. C. N. DAVIES (from 1970 to 1984)

Aims and Scope

The *Journal of Aerosol Science* is a long-established international publication which sets out to encourage and foster all aspects of basic and applied aerosol research by publishing high quality scientific papers in that very multidisciplinary field. The submission of original papers is encouraged, describing recent theoretical and experimental research relating to:

—the basic physical and chemical properties of particles in aerosol systems of all types
—their measurement
—their formation, transport and deposition
—their industrial, medical and environmental effects and applications.

Occasional reviews of broader interest may also be considered. The aim in all published articles is to present results in a form which can be generalized as far as possible.

EDITORS-IN-CHIEF

Dr G. KASPER
American Air Liquide, Inc.,
5230 S. East Avenue,
Countryside, IL 60525, U.S.A.

Dr J. H. VINCENT
Institute of Occupational Medicine,
8 Roxburgh Place,
Edinburgh EH8 9SU, U.K.

CONTENTS

NUMBER 1

J. CHOMIAK and A. K. GUPTA	1	Thermophoresis in boundary layer flows
H.-R. PAUR and S. JORDAN	7	The influence of SO_2 and NH_3 concentrations on the aerosol formation in the electron beam dry scrubbing process
D. WAKE	13	Anomalous effects in filter penetration measurements using the Aerodynamic Particle Sizer (APS 3300)
G. S. SPAGNOLO	19	Automatic instrument for aerosol samples using the beta-particle attenuation
G. L. FINCH, M. D. HOOVER, J. A. MEWHINNEY and A. F. EIDSON	29	Respirable particle density measurements using isopycnic density gradient ultracentrifugation
P. C. S. DEVARA and P. E. RAJ	37	Remote sounding of aerosols in the lower atmosphere using a bistatic CW helium–neon lidar
J. R. CONDER and T. P. LIEW	45	Fine mist filtration by wet filters—II: efficiency of fibrous filters
J. R. CONDER and T. P. LIEW	59	Fine mist filtration by wet filters—III: sintered disc filters
N. P. VAUGHAN	67	The Andersen impactor: calibration, wall losses and numerical simulation
M. BERTERO, P. BOCCACCI, C. DE MOL and E. R. PIKE	91	Extraction of polydispersity information from photon correlation data
S. E. PRATSINIS and K.-S. KIM	101	Particle coagulation, diffusion and thermophoresis in laminar tube flows
R. VAN DINGENEN, F. RAES and H. VANMARCKE	113	Molecule and aerosol particle wall losses in smog chambers made of glass
M. H. PETERS, D. W. COOPER and R. J. MILLER	123	The effects of electrostatic and inertial forces on the diffusive deposition of small particles onto large disks: viscous axisymmetric stagnation point flow approximations
Discussion		
D. CAMUFFO, W. W. NAZAROFF and G. R. CASS	137	Particle deposition from a natural convection flow onto a vertical isothermal flat plate

NUMBER 2

J. GEBHART, CH. F. SCHILLER-SCOTLAND, M. J. EGAN and W. NIXON	141	On the relationship between experimental data for total deposition and model calculations—Part I: effect of instrumental dead space
M. J. EGAN and W. NIXON	149	On the relationship between experimental data for total deposition and model calculations—Part II: application to fine particle deposition in the respiratory tract
H.-K. CHAN and I. GONDA	157	Aerodynamic properties of elongated particles of cromoglycic acid
M. R. BAILEY, W. G. KREYLING, S. ANDRE, A. BATCHELOR, C. G. COLLIER, E. DROSSELMEYER, G. A. FERRON, P. FOSTER, B. HAIDER, A. HODGSON, R. MASSE, H. METIVIER, A. MORGAN, H.-L. MÜLLER, G. PATRICK, I. PEARMAN, S. PICKERING, D. RAMSDEN, C. STIRLING and R. J. TALBOT	169	An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part I: objectives and summary of results
P. P. FOSTER, I. PEARMAN and D. RAMSDEN	189	An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part II: lung clearance of inhaled cobalt oxide in man
S. ANDRE, H. METIVIER and R. MASSE	205	An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part III: lung clearance of inhaled cobalt oxide particles in baboons
W. G. KREYLING, G. A. FERRON and B. HAIDER	219	An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part IV: lung clearance of inhaled cobalt oxide particles in Beagle dogs
C. G. COLLIER, M. R. BAILEY and A. HODGSON	233	An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part V: lung clearance of inhaled cobalt oxide particles in hamsters, rats and guinea-pigs
G. PATRICK, A. L. BATCHELOR and C. STIRLING	249	An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part VI: lung clearance of inhaled cobalt oxide particles in SPF Fischer rats
E. DROSSELMEYER, H.-L. MÜLLER and S. PICKERING	257	An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part VII: lung clearance of inhaled cobalt oxide particles in Sprague–Dawley rats

R. J. TALBOT and A. MORGAN 261 An interspecies comparison of the lung clearance of inhaled monodisperse cobalt oxide particles—Part VIII: lung clearance of inhaled cobalt oxide particles in mice

F. S. ROSENTHAL 267 Aerosol recovery following breathholding derived from the distribution of chordlengths in pulmonary tissue

1. *Basic Aerosol Science*

F. LESAFFRE: Characterization of aerosol aggregates through fractal parameters. Effects due to humidity 857

H.-J. KLINGEN and P. ROTH: Size analysis and fractal dimension of diesel particles based on REM measurements with an automatic imaging system 861

A. A. LUSHNIKOV, V. V. MAKSIMENKO and A. V. PAKHOMOV: Fractal aggregates from laser plasma 865

T. CLEARY, J.-R. PAO, G. MULHOLLAND and J. W. GENTRY: Measurement and simulation of soot agglomerates and aggregates 871

I. COLBECK, K. ELEFTHERIADIS and S. SIMONS: The dynamics and structure of smoke aerosols 875

F. BAUMGÄRTNER and C. SCHAUER: On the formation mechanism of hollow-sphere aerosols 879

F. BAUMGÄRTNER, A. ZANIER and K. KREBS: On the mechanical stability of hollow NaCl-particles 883

S. K. Friedlander, W. Koch and H. H. Main: Scavenging of a coagulating fine aerosol by a coarse particle mode 887

W. Koch and S. K. Friedlander: The effect of particle coalescence on the surface area of a coagulating aerosol 891

Y. C. Chang, R.-J. Han, K. Chang, S. Soulen, M. B. Ranade, R. V. Calabrese and J. W. Gentry: Simulation and analysis of cluster breakage with applications in turbulent mixing 895

F. Stratmann and H. Fissan: Experimental and theoretical study of submicron particle transport in cooled laminar tube flow due to combined convection, diffusion, and thermophoresis 899

H. Rohatschek: Photophoretic levitation of carbonaceous aerosols 903

D. Hall: The time dependence of particle resuspension 907

A. Fromentin: Time dependent particle resuspension from a multi-layer deposit by turbulent flow 911

H.-C. Wang, H.-Y. Wen and G. Kasper: Mechanisms on particle generation by mechanical shocks 915

H.-C. Wang: Theoretical comparison on mechanisms to overcome particle surface adhesion 919

H. Y. Wen, G. Kasper and R. Udischas: Short and long term particle release from surfaces under the influence of gas flow 923

E. Gavze: The accelerated motion of particles in a fluid at low Reynolds number 927

G. N. Lipatov and E. A. Chernova: Thermophoresis of highly dispersed aerosols 931

G. N. Lipatov, S. A. Grinshpun and T. I. Semenyuk: Properties of crosswise migration of particles in ducts and inner aerosol deposition 935

G. N. Lipatov, T. I. Semenyuk, S. A. Grinshpun, V. I. Yakimchuk and A. S. Skaptsov: Interaction between coarse aerosol particles and inner walls of the upright tracts (adhesion, rebound and blow-off) 939

P. Drtina, Th. Kraut and A. Frohn: Experimental and theoretical investigation on originally monodisperse droplets injected into a turbulent channel flow 943

E. Pfalzmann and P. E. Wagner: Experimental investigations of aerosol flow stability at low Reynolds numbers 947

M. Shapiro and H. Brenner: Dispersion and deposition of aerosol particles in porous filters 951

J. Cai and F. Peterson: Efficiency for monodisperse particles in instationary filtration 955

J. Cai: Some remarks on efficiency due to dendrite formation 959

V. PRODI, S. AGOSTINI and F. BELOSI: Submicron oil droplet filtration 963

S. A. SOULEN, T. W. CLEARY, R.-J. HAN, Y.-C. CHANG and J. W. GENTRY: Size dependent penetrations from microscopy: experiment and theory 967

L. GRADOŃ, A. PODGÓRSKI and P. GRZYBOWSKI: Deposition of flexible and stiff fibrous particles 971

S. A. GRINSHPUN, G. N. LIPATOV and T. I. SEMENYUK: Aerosol separation within entrance regions of the upright channels (experiments and calculation) 975

G. N. LIPATOV and A. S. SKAPTSOV: Experimental study of the filtering unit for ultrafine aerosols 979

S. M. WALL, W. JOHN and S. L. GOREN: A modified elastic–plastic impact adhesion theory applied to particle kinetic energy loss measurements 983

A. A. LUSHNIKOV and V. A. ZAGAYNOV: Random factors in aerosol kinetics 987

N. ROTH, K. ANDERS and A. FROHN: Mutual interaction between burning aerosol droplets in the micrometer range 991

R. KARCH, G. P. REISCHL, W. WINKLMAYR, S. PAULSON, S. C. WANG, F. YIN, R. C. FLAGAN and J. H. SEINFELD: Smog chamber studies of aerosol formation in atmospheric mixtures 995

F. STRATMANN and E. WHITBY: Heterogeneous condensation in cooled laminar tube flow: a comparison of two aerosol modeling techniques 999

I. GALLILY, M. PEKAREVITCH and E. GAVZE: The coagulation and dispersion of non-spherical aerosol particles in a turbulent atmosphere 1003

H. STRAUBEL and E. STRAUBEL: Monolayers and their evaporation in molecular regions 1007

J. TIMMLER and P. ROTH: High temperature evaporation rates of solid particles 1011

C. F. CLEMENT and I. J. FORD: The homogeneous nucleation of aerosols 1015

V. M. MERKULOVICH and A. S. STEPANOV: On statistical fluctuation in coagulating aerosol 1019

M. KULMALA, A. MAJEROWICZ and P. E. WAGNER: Condensational growth at large vapour concentration: limits of applicability of the Mason equation 1023

G. BRENN and A. FROHN: Collision and coalescence of droplets of various liquids 1027

S. TOHNO and K. TAKAHASHI: Morphological changes of Pb fumes by Brownian coagulation 1031

S. Fuzzi, G. Cesari, M. C. Facchini, R. Lenaz, A. Berner, D. Ferri and M. Mariotti: Characterization of atmospheric particulate matter over the eastern Mediterranean Sea 1241

U. FRITSCHE, A. BROCKHAUS, D. HOCHRAINER, H. E. WICHMANN and J. M. WALDMAN: Comparison of acidic aerosols at two sites in Germany 1245

H. JÄGER: The variability of the stratospheric aerosol layer over Central Europe 1249

G. M. MARCAZZAN, M. MAUGERI and P. BONELLI: Study of a pollution transport event at an alpine mountain station 1253

C. M. ROJAS, P. M. OTTEN and R. E. VAN GRIEKEN: Characterization of airborne particulate matter collected over the North Sea 1257

M. BIZJAK, V. HUDNIK, I. GRGIĆ and D. HRČEK: Chemical composition of fog and solid atmospheric particles collected during fog episodes in Ljubljana 1261

J. S. PASTUSZKA, J. KOLARCZYK and A. SZTYLER: Preliminary studies of elemental carbon mass size distribution in Katowice 1265

YU. S. LYUBOVTSEVA and L. G. YATSKOVICH: Soot in the aerosols of different regions 1269

H. HORVATH, A. TRIER and L. CATALAN: The relationship between outdoor and indoor soot concentrations in an urban environment 1273

TH. TUCH, P. BRAND, G. A. FERRON, E. KARG, W. G. KREYLING, L. LEUSCHEL, K. MAIER and J. HEYDER: Properties of a sodiumbisulfite aerosol 1277

3. *Health-related Aerosols*

B. RUDELL, O. MARQVARDSEN, K. LINDSTRÖM and B. KOLMODIN-HEDMAN: A method for controlled exposure to diesel exhaust from a continuously idling diesel engine 1281

J. MARIJNISSEN, H. BUWALDA, M. VAN PINXTEREN, S. LEMKOWITZ and H. BIBO: Production of well-defined organic fibres for inhalation experiments 1285

C. ROTH, S. WESTENBERGER and W. G. KREYLING: Production of ^{111}In-labelled monodisperse aerosol particles 1289

G. SCHEUCH, J. GEBHART, G. HEIGWER and W. STAHLHOFEN: A new device for human inhalation studies with small aerosol boluses 1293

G. A. FERRON, F. ERBE, G. FÜRST, B. HAIDER, J. HALLER, B. KÖHL, W. G. KREYLING, G. SCHUMANN, M. STOCKER and J. HEYDER: A scintillation counter for measuring removal of radioactive particles from dog lungs 1297

M. J. EGAN, W. NIXON, N. I. ROBINSON, A. C. JAMES and R. F. PHALEN: Inhaled aerosol transport and deposition calculations for the ICRP Task Group 1301

CH. F. SCHILLER-SCOTLAND, J. GEBHART, H. LINTL, R. SIEKMEIER and H. KRONENBERGER: Human airway diameters derived from aerosol inhalation studies: reactions of non-smokers and smokers to bronchodilators 1305

R. M. Evans, D. Attwood, S. M. Chatham and S. J. Farr: A novel strategy for the formulation of medicinal aerosols 1309

W. Hofmann and L. Koblinger: The effect of polydispersity of radioactive aerosols on the activity distribution in the human lung 1313

W. G. Kreyling, S. André, C. G. Collier, G. A. Ferron, H. Métivier and G. Schumann: Interspecies comparison of lung clearance after inhalation of monodisperse, solid cobalt oxide aerosol particles 1317

W. Luo: A model for the nose and its efficiency in collecting airborne particles 1321

M. Dahlbäck, S. Eirefelt, I.-B. Karlberg and O. Nerbrink: Total deposition of Evans blue in aerosol exposed rats and guinea pigs 1325

Y. Y. Hammad and B. Attieh: Pulmonary deposition of MMMF 1329

S. Takenaka, U. Glaser, H. Oldiges and U. Mohr: Pulmonary changes in rats after long-term exposure to CdO-aerosols 1333

R. A. Roos and M. Goldman: On the behaviour of activated particles in cigarette smoke 1337

J. N. Pritchard: Dust overloading—a case for lowering the TLV of nuisance dusts? 1341

W. Möller and W. Stahlhofen: Magnetic material in the lungs of dental technicians 1345

M. Neuberger: Cancer in men from fibrous and non-fibrous mineral particles 1349

W. Wilczek, E. Drosselmeyer, I. Lind, E. Mainka and A. Seidel: Investigations on the mechanisms of the *in vitro* toxicity of the high T_c superconducting material $YBa_2Cu_3O_7$ on bovine alveolar macrophages 1353

4. *Industrial Aerosols*

R. A. Bowling and G. B. Larrabee: Clean technology for microelectronics manufacture in the U.S. 1989 and 1995 1357

P. Biswas, Y. Tian and S. E. Pratsinis: Receptor modeling of microcontamination in clean rooms 1361

J. I. T. Stenhouse and L. Arnold. Aerosol contamination of clean gases in valves 1365

M. H. Heiskanen and E. I. Kauppinen: The particle size characterization of combustion aerosols 1369

G. E. Andrews, M. K. Abbass, P. T. Williams and K. D. Bartle: Factors influencing the composition of the organic fraction of diesel particulates 1373

K. Engeljehringer and W. Schindler: The organic insoluble diesel exhaust particulates—differences between diluted and undiluted measurements 1377

C. KRUISZ, G. P. REISCHL, U. PFEIFER and F. LEHNER: The influence of a corona discharge on mass size distribution and net charge of diesel exhaust particles 1381

C. BECKMANN, G. ISRAËL and K. MOLLENHAUER: Artifact formation of nitrated polycyclic aromatic hydrocarbons during diesel soot sampling on Teflon coated glass fiber filters 1385

C. H. LIN, B. T. CHAO and S. L. SOO: Corona charging of diesel smoke 1389

A. KRASENBRINK and B. GEORGI: Continuous measurement of soot concentration in diesel exhaust 1393

S. PICKERING: The resuspension of radioactive dusts in fires 1397

S. A. RAMSDALE: The chemical conversion and dispersion of toxic sodium fire aerosols in the atmosphere 1401

W. SCHÖCK and M. WAGNER-AMBS: Aerosol generation by bubble bursting from a boiling pool 1405

G. TARRONI, C. M. CASTELLANI and T. DE ZAIACOMO: Morphological analysis and evaluation of dynamic shape factor of particles produced in a real scale sodium fire 1409

G. TYMEN, B. EL MOUSSAOUI and A. RENOUX: Dynamics of Rn-222 daughter size distribution evolution: modelling and experimental aspects 1413

W. KATSCHER and B. STAUCH: Experimental investigation of aerosol formation from metallic fission products under hypothetical accident conditions in high-temperature gas-cooled reactors 1417

K. KUGELER, CH. EPPING and J. ROES: Importance of radioactive aerosols in hypothetical high temperature reactor accidents 1421

K. W. NICHOLSON, J. R. BRANSON, P. GIESS and R. J. CANNELL: The effects of vehicle activity on particle resuspension 1425

K. P. KOUTZENOGII: Ecology and optimum aerosol technology of pesticide application 1429

M. BELOW and B. GEORGI: Plant growth—influenced by particulate nitrate application 1433

A. KRASENBRINK, B. GEORGI and H. KIßLER: Cleaning of aerosol loaded gases by a new steam generator 1437

M. MONABBATI, S. AYATOLLAHI and M. TAHERI: Test of mathematical modeling for the design of high energy scrubbers 1441

S. WITTIG, H.-J. FELD and A. TREMMEL: The application of the dispersion quotient technique for particle size and density measurements behind an Electron Beam Scrubber 1445

J. HAUTANEN: The effect of desulfurization on the function of an industrial electrostatic precipitator 1449

M. DJUPSTRÖM, E. SELIN and M. ÖBLAD: Fingerprints in the particulate emissions from an oil refinery 1453

S. E. PRATSINIS, J. D. LANDGREBE and S. V. R. MASTRANGELO: Design correlations for gas phase manufacture of ceramic powders 1457

S. E. PRATSINIS: Particle production by gas-to-particle conversion in turbulent flows 1461

A. ZAJC, E. UHLIG, H. HACKFORT and R. NIESSNER: On line and *in situ* control of aerosol emission from hazardous waste combustion 1465

D. GUZIJAN, S. BOROJEVIĆ and R. NINKOVIĆ: The complex testings of the coal drying system in the Fleissner type of drying plant 1469

H. BUSCH, W. HOLLÄNDER, K. LEVSEN, J. SCHILHABEL, F. J. TRASSER and L. NEDER: Aerosol formation during laser cutting of fibre reinforced plastics 1473

A. KLEITZ and J. J. COURANT: Probes for industrial particle measurement: application for water droplet sizing in wet steam turbines 1477

5. *Aerosol Instrumentation*

E. KARG, P. BRAND, B. HIETEL, W. G. KREYLING, K. RUOß, J. TSCHIERSCH, T. TUCH and J. HEYDER: Intercomparison of particle size spectrometers 1481

S. C. WANG and R. C. FLAGAN: Scanning electrical mobility spectrometer 1485

B. T. CHEN, Y. S. CHENG and H. C. YEH: An experimental approach to studying particle density effects in the TSI aerodynamic particle sizer (3300) 1489

A. HOSPITAL and P. ROTH: A molecular beam mobility analyser applied to nm-sized charged soot particles 1493

N. G. BERNIGAU and R. M. VANCK: Time varying charge levels as an alternative approach for aerosol concentration measurements 1497

P. BARTHOLME and K. H. KÄSELAU: A portable Aitken nuclei counter 1501

D. BOULAUD, C. COMPER and M. DIOURI: Comparison between the SDI and electrical methods for the measurement of fine aerosols 1505

R. A. ROOS and D. DUTERTRE-LADUREE: The optical and electrical measurement of aerosols produced by normalized fires 1509

G. N. LIPATOV and G. L. SHINGARYOV: Thermodiffusion chamber with longitudinal temperature gradient 1513

K. Y. K. CHUNG and J. THOMPSON: Coulter vs APS—a comparative study 1517

F. SCHRÖDER, W. KOCH and K. H. KÄSELAU: Redesign of an approved condensation nuclei counter for stationary use 1521

U. K. BOCHERT and W. DANNECKER: On-line aerosol analysis by atomic emission spectroscopy 1525

J. GEBHART, P. BRAND and C. ROTH: A combined DMA–CNC-test-system for commercial laser particle counters 1529

H. GERBER: Measurement of suspended particulate volume and far-infrared extinction coefficient with a new laser-diffraction instrument 1533

H. KOHL, J. GEBHART and E. GRÜN: Laser particle characterization under interplanetary space conditions 1537

B. SACHWEH, H. BÜTTNER and F. EBERT: Improvement of the resolution and the counting accuracy of an Optical Particle Counter by fast digital signal recording 1541

D. SEEHARS, F.-J. MÖNIG, D. HOCHRAINER, M. SPIEKERMANN and N. SCHWARZER: Measurement of the concentration and dispersion of aerosols by optical sensors in closed rooms 1545

B. G. VAN ELZAKKER and A. VAN DER MEULEN: Performance characteristics of various beta-dust monitors: intercomparison 1549

A. KRASENBRINK: Dust measurement with a new radiometric dust monitor (FH62 I-N) 1553

S. J. DUNNETT: A mathematical study of thin-walled sampling probes orientated to the flow 1557

S. A. GRINSHPUN, G. N. LIPATOV and T. I. SEMENYUK: A study of sampling of aerosol particles from calm air into thin-walled cylindrical probes 1561

V. PRODI, C. SALA, F. BELOSI, S. AGOSTINI, G. BETTAZZI and A. BILIOTTI: PERSPEC, personal size separating sampler: operational experience and comparison with other field devices 1565

W. W. SZYMANSKI and B. Y. H. LIU: An airborne particle sampler for the Space Shuttle 1569

V. PRODI, G. BETTAZZI and F. BELOSI: High temperature particle sampling with size separation 1573

W. HOLLÄNDER: Proposed performance criteria for samplers of total suspended particulate matter 1577

S. A. GRINSHPUN, T. I. SEMENYUK and G. N. LIPATOV: Working conditions for atmospheric measurements by an aerosol annular slot sampler 1581

K. D. HORTON and J. P. MITCHELL: Water droplet fragmentation in an Andersen Mark-III in-stack cascade impactor 1585

J. F. FABRIES, P. GÖRNER and R. WROBEL: A new air sampling instrument for the assessment of the thoracic fraction of an aerosol 1589

R. A. FLETCHER, E. B. STEEL, M. BEARD, C. C. WANG and J. W. GENTRY: Uniformity of particle deposition for indoor air sampling under anisokinetic conditions 1593

S. E. PRATSINIS, M. XU, P. BISWAS and K. WILLEKE: Theory for aerosol sampling through annular diffusion denuders 1597

I. A. MARSHALL, J. P. MITCHELL and W. D. GRIFFITHS: A method for presenting aerosol particles to a TSI aerodynamic particle sizer after size selection under Stokesian conditions 1601

P. M. MELTON, P. K. P. BURNELL and R. M. HARRISON: The Spinning Top Aerosol Generator (STAG) MKII—a critical appraisal 1605

B. KNEIßEL: Remote sensing of interplanetary dust: methods developed for the investigation of interplanetary dust. Fruitful tools for the analysis of aerosol clouds? 1609

G. POHLMANN and W. HOLLÄNDER: A modified laser doppler technique for simultaneous determination of particle size and deposition velocity 1613

C. XHOFFER, W. JACOB and R. VAN GRIEKEN: Application of electron energy loss spectroscopy to aerosols 1617

G. SCHWEIGER: Single microparticle analysis by Raman spectroscopy 1621
